22.1 April Release Items

4/20/2022

1 Summary

Below are the included items in the April Release of the API, Auth, CR, NG, and Portal applications.

- Added new Summary POT chart to Data Views & Charts.
- Updated Reporting Compliance Report popups, Data Validation tab and EVM Reporting Dashboard to be 508 compliant.
- Added updated Submitter and Reviewer guides to Portal Home tiles.
- Numerous bug fixes in the Auth, CR, Portal, and NG applications.
- New Level 1 Data Package download.
- Package updates in all sites: API, Auth, CR, External API, NG, Portal, Web Services Admin, and Web Services Host.

2 Site Changes

The primary changes in this release were updates to the Data Views & Charts page, including the addition of the new Summary POT chart. The rest of the changes included a new Level 1 Data Package download and several bug fixes in the Auth, CR, Portal, and NG applications.

API

Added new call for the Summary POT chart.

Auth

Modified the External Client Registration page.
Fixed the cancel button on Change Password.
Updated contact us link.
Fixed bug forcing users who had created a new account to associate with their CAC to login in an extra time.

CR

Fixed scoring bug for submissions with both preliminary and final files.
Fixed bug darkening page background when uploading a file and switching between human readable file types.
Fixed bug throughout site that deleted date if user selected the already highlighted date in the datepicker.
Switched directions of the Navigate File Periods arrows.
Updated Contract Detail's Reviewers and Submitters columns to sort both ascending and descending.
Removed back button from Submission Detail's quick link for the Performance Over Time chart.
Moved Effort Events functionality to Contract Detail's Reporting Streams tab.
Added Stop Work column to Contract Detail's Reporting Streams grid.
Fixed bug stopping the entire colored box on the Reporting Compliance Report from being clickable.
Fixed bug on Contract Detail so the page state is saved when leaving the page and going directly back.

Fixed bug allowing reviewers to request deactivated contracts.

Updated RCR popup, Data Validation tab, and EVM Reporting Dashboard to be 508 compliant.

Addressed the frequent timeouts on Contract Details' Received Submissions tab.

NG

Stopped exception from being thrown when selecting an effort without data in the Data Views & Charts.

Updated Data Views & Charts to hide Selected Period dropdown while on the Charts tab.

Added new Summary POT chart to the Data Views & Charts page.

Portal

Fixed bug with dashboard reading deleted tiles.

Added maximum limits to Contract Request dropdowns and autocompletes.

Added Company Name to the User Audit list.

Updated tiles with new Submitter and Reviewer guides.

Updated Tile Detail pages.

Added new Level 1 Data Package Tile.

Added new email shortcut to send a Pending NDA automated email to user.

Added character limit to NDA comments.

3 DB Changes

There were changes made to the DCARCPortal, EVM, EVMData, and EVMFiles Databases.
